

INMAGIC® DB/Text® *Library Suite*

Meeting the Changing Needs of the Special Library

The Inmagic® DB/Text® *Library Suite* allows users to easily manage and publish collections on the Web.

The DB/Text® *Library Suite* meets the changing needs of information centers that must manage and provide effective access to both traditional and nontraditional library materials. It is a powerful, flexible, Web-based integrated library system (ILS) which enables the organized sharing of information within and across workgroups which can increase efficiency, improve performance, and add to the bottom line.

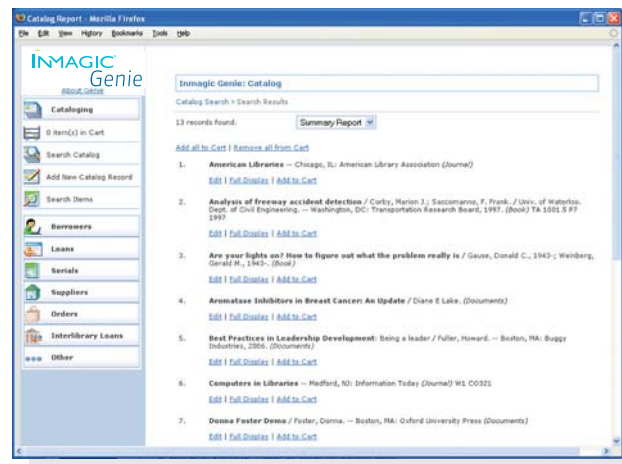

DB/Text *Library Suite* is an integrated collection anchored by our *Genie* ILS application which provides you with all-inclusive library management functionality, delivered in a streamlined, easy-to-use interface. *Library Suite* is designed for workgroups within organizations managing single-site and multi-site libraries that want a single catalog covering multiple collections.

The Integrated Suite

Inmagic® *Genie* is a Web-based ILS providing standard library management functionality that conforms to each library's unique needs, meeting the information requirements that go beyond the bounds of a standard ILS. Our ILS enables you to effectively manage your critical information, gain increased independence from IT, and achieve a low total cost of ownership by delivering all standard back office functionality in a single application.

Inmagic® DB/Text® *Web Publisher Pro* is a toolset to enable interactive Web publishing and access which allows users to deploy, publish and maintain textbases on the Web quickly and easily. Its high-speed fielded search engine makes finding information fast, easy and precise. Through the use of such standards as XML, HTML, and SOAP, *Web Publisher Pro* gives you the ability to interact with information, publish content and edit records in a Web browser.

Inmagic® DB/TextWorks® is a special combination of database and text retrieval software for Windows that enables you to build networked and standalone textbases to manage diverse types of information. With a customer base spanning many industries, DB/TextWorks provides an easily managed knowledge repository to utilize and preserve your content and information assets.

An All-Inclusive Library Solution

The *Library Suite* was designed from the ground up for the Web to deliver core library automation functionality in a single solution. This comprehensive and flexible application provides customers with all the back office functions necessary to manage growing collections. As your library requirements expand and change, the functions necessary to accommodate that growth are inherent in our ILS solution.

Core ILS Functionality:

- CATALOGING
- CIRCULATION
- SERIALS Management
- ACQUISITIONS
- WEB OPAC
- INTERLIBRARY LOANS
- IMPORT/EXPORT
- MARC Compatibility

Rapid Deployment

To ensure you receive the greatest possible value from all of our products, Inmagic provides comprehensive implementation services through our Professional Services Group and a network of certified value-added partners around the world. Our team of implementation experts is dedicated to your success and works directly with you to get your information management system up and running quickly. Our rapid product deployment brings you quickly to full implementation, where you can begin to experience the efficiencies which come with our complete information management solution.

For the thousands of organizations currently using Inmagic DB/Text products, upgrading to *Library Suite* is extremely cost effective and straightforward. As an aid to migration, Inmagic and its partners will work with you to automate much of the work involved in moving your data, forms, and reports to a Web-based interface.

Inmagic offers numerous ways to purchase and deploy *Library Suite* including perpetual or subscription licensing and on-premises or hosted deployments. Our managed hosting options provide the stable yet flexible foundation needed for cost-effective deployment of your information management system or ILS.

Reduced Reliance on IT

Library Suite's unmatched flexibility and configurability requires minimal support from your IT organization. With our flexible ILS and Web publishing features, your collections are managed and critical information is published with an advanced level of independence. The self-reliance gained from the administrative features of the *Library Suite* allows you to spend less time on clerical and administrative duties and focus more time on gaining value from your information center.

Library Suite can conform to each library's unique needs, information resources and workflow. *Library Suite* is an open system, with an XML API. You can export all of your data at any time in various formats including XML, and you have the ability to share your records with other libraries in MARC format. *Library Suite* utilizes Web services that enable the information center to interoperate within your organization's overall IT architecture.

Customer Benefits:

- Single, all-inclusive library solution
- Low total cost of ownership
- Rapid ROI
- Reduced reliance on IT
- Effectively manage both digital and non-digital assets

Providing Self-Service for End Users:

- Retrieve information 24/7 via the Web
- Conduct powerful OPAC searches by keyword, author, title, subject, and by customized fields
- Check your fully-configurable librarian's dashboard for an up-to-date view of critical library items, then act directly on those items
- Build, access and publish ad hoc databases
- Configure fields, labels, screens, and reports
- Use the InfoCart to store items for later retrieval and action
- Log into "My OPAC" to view their open loans, overdues, reserves, routed serials and borrower information
- Upload images and documents, including full-text indexing
- Perform Self-Checkout
- Share your records with other libraries in MARC format
- Open system, XML API
